

Isha Kulkarni

Southampton, UK

ishakulkarnimscs@gmail.com — linkedin.com/isha-kulkarni — ishakulkarni011.github.io

Professional Summary

MSc Computer Science student with professional experience as a Python Developer and Generative AI Engineer, developing scalable ML and LLM-powered automation systems. Strong background in multi-agent architectures, retrieval-augmented generation, and production Python pipelines, delivering measurable efficiency gains across enterprise platforms.

Education

University of Southampton, UK

Expected 2026

MSc Computer Science

Core Modules: Machine Learning, Artificial Intelligence, NLP

Savitribai Phule Pune University, India

2023

B.E. Information Technology

CGPA: 9.02 / 10 — Ranked Top 3 for three consecutive years

Experience

Persistent Systems Ltd., India

Aug 2023 – Jul 2025

Python Developer & Generative AI Engineer

- Built and deployed ML and LLM-based automation pipelines in Python, reducing manual engineering and QA effort by **35–60%**.
- Designed **multi-agent GenAI systems** using agentic and MCP frameworks to automate test generation and script migration, improving release velocity.
- Delivered **5+ reusable GenAI accelerators** (RAG pipelines, LLM-driven code generation tools) adopted across teams on AWS and Azure.
- Implemented prompt engineering, retrieval augmentation, and evaluation strategies to improve output accuracy and system reliability.

Revyamp Consulting, India

Nov 2022 – Jul 2023

Software Developer Intern

- Built a Python-based invoice data extraction system using OCR and Pandas, eliminating manual data entry.
- Improved extraction accuracy through validation and transformation pipelines.

Projects

GenAI-Based UI Test Automation — Built an LLM-powered system to generate UI automation scripts from object repositories, reducing manual scripting effort by **50%**.

Malicious Activity Detection on Social Media — Developed an ML-based NLP pipeline to detect spam, fake accounts, and hate speech; published a research paper on real-time monitoring.

Technical Skills

Languages: Python, Java

Machine Learning: Supervised & Unsupervised Learning, NLP, Feature Engineering, Model Evaluation

Generative AI: LLMs, Prompt Engineering, RAG, Fine-Tuning, Multi-Agent Systems

Frameworks & Libraries: PyTorch, TensorFlow, Scikit-learn, LangChain, Hugging Face, Pandas, NumPy

Cloud & Tools: AWS, Azure OpenAI, Git, Jupyter Notebook, VS Code

Databases: MySQL, MongoDB

Achievements

- Persistent FY24 Bravo Award for innovation in enterprise AI solutions.
- Best Innovative Project Award for malicious activity detection project.
